

I would like to express my love of listening to K-LOVE radio. Not only do they provide great music that is up to date and enjoyable to listen to, but they help me to have a more broad view of what is happening across America. They are always informing us of things that are happening in other parts of America. I do enjoy their perspective. I am not in my own little world, alone, but apart of the community and you feel that when you listen to their radio. Since I live in a rural area, I do not have many choices of radio stations that I can enjoy. K-LOVE is the only station I listen to and I would be very disappointed in losing it. And I probably would not be able to pick up a LPFM station, as I am too far away. And I know that there are many others in the area that listen to K-LOVE. They too, do not have much of a choice of what they can listen too. It would be a very empty feeling without their broadcasting to my area. I believe that K-LOVE uplifts the community and is a valuable asset to us here in the rural area. Thank you, Richard
